

To inspire our writing, and inform our topic work, we will also be reading...

Hidden Figures
By Margot Lee Shetterly

Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden were good at maths...*really* good.

They participated in some of NASA's greatest successes, like providing the calculations for America's first journeys into space. And they did so during a time when being black and a woman limited what they could do. But they worked hard. They persisted. And they used their genius minds to change the world.

The Rhythm of the Rain
By Grahame Baker-Smith

From tiniest raindrop to deepest ocean, this breathtaking celebration of the water cycle captures the remarkable movement of water across the earth in all its majesty.

A stunning non-fiction picture book, which is also about all of us and our most basic and profound connections in the world.
